

PROPHYSICS GCSE PHYSICS BOOSTER

MEMBERSHIP FAQs

What exam board do you cover?

All sessions, workbooks, and resources are built around the AQA specification however the content covered is suitable for Edexcel IGCSE, please get in touch if you'd like to find out more about this.

How much does it cost?

Year 10 (60-minute sessions): £99/month

Year 11 Physics (75-minute sessions): £109/month

Year 11 Combined Science Trilogy Physics (60-minute sessions): £99/month

This is a fixed monthly membership fee, rather than paying per session — so it stays the same every month regardless of how many sessions fall within it.

Is there a contract?

No. There's no contract and no minimum commitment. You pay monthly and can cancel at any time.

What happens during school holidays?

Weekly sessions run during term time only. As a Year 11 Physics member, you'll receive 50% off all optional holiday revision sessions, which run in October half term, February half term, Easter, and May half term.

Does it matter if we join part way through a term?

Not at all, these sessions will be beneficial whenever students join. I work to a planned schedule and timeline however they can catch up on any previous sessions they may have missed.

Do you provide marked homework or written feedback?

Students are asked to complete a weekly feedback task which I then mark and record my feedback so that they can see where they did well, and more importantly, any areas for improvement. This allows students (and parents) to keep track of student progress over time. I do not provide written progress reports as part of the membership. I also feedback directly to students both verbally and through live interactive marking during the sessions. The feedback task provides students with the materials they need to develop independent study habits to consolidate what they have worked on in the session, and full solutions are given to both the student workbooks and feedback tasks. Sessions are built around live teaching, guided practice, and exam technique within the session itself, and general feedback on common misconceptions is often shared with the group. If you'd like more personalised feedback on your child's individual work, get in touch and we can discuss whether this can be arranged separately.

What's included every month?

- Weekly live group sessions
- A structured workbook for every session
- A follow up feedback task which students submit for marking.
- A recording of every session, available to revisit at any time
- 50% off all holiday revision sessions (Year 11 Physics Membership only)

How big are the groups?

No more than eight students per group, so your child gets genuine attention without the cost of 1:1 tuition.

What if my child misses a session?

Group sessions can't be rescheduled or refunded for individual absence, but your child will still receive the workbook, the session recording, and access to all materials covered.

What if I want to join partway through a month?

You're welcome to join at any point. Your first payment covers you from your joining date, and your monthly billing date will then fall on that same date each month going forward.

Do you offer 1:1 tuition as well as group sessions?

Yes, 1:1 sessions are available separately, subject to availability. Get in touch to discuss your child's specific needs.

What happens in Year 11 before exams?

Year 11 members receive two pre-exam walkthrough sessions in May and June, the night before each paper, included as part of their membership.

How do I get started?

Get in touch to check availability for your child's year group. A £50 deposit secures your place, which comes off your first month's membership fee.
